Oops! I-KOOO!

HD 52 X 10 min

- 2014 - 2015 • Number of Season : 2
- Language(s) Available : English, Spanish, Vietnamese
- Producer : MARO STUDIO, EBS
- Age Group : Preschool

Things that adults take for granted can seem bewildering to little children who have not yet learned about them, as twenty-something Doh Remi finds out when her grandfather suddenly has her babysit six-year-old I-KOOO. But I-KOOO is no typical kid — he's actually a pea-headed prince from another planet. It's Remi's job to teach the royal visitor all about living on planet Earth, from electricity and fire safety, to good public manners and eating healthy food. Fortunately the talented Remi has help from I-KOOO's robot named BB, who disguises himself as a teddy bear, but contending with the stubborn I-KOOO's arrogance and mischief is a royal headache. <Oops! I-KOOO!> is a fun and engaging animated series for kids that is ideal for teaching them what they themselves need to know about the world around them.

What's This, MOYA?

HD 26 X 15 min

This entertaining and educational series is aimed at facilitating the cognitive development of children between the ages of 18 and 30 months. Joined by MOYA the Elephant, a hand puppet that communicates with its trunk and propeller, and the guiding voice of MOYA's friend The Narrator, we explore various topics within the subject areas of spatial perception, bodily awareness, logical and mathematical thought, cause and effect, and the qualities of physical objects. By mixing graphic and realistic representations of the topic at hand, and by including a simple quiz and helpful tips for parents wishing to help their children engage with the new concepts presented, this series is sure to keep toddlers engaged and entertained as they learn. And then there's the mysterious 'Magic Box', which contains all kinds of treasures, such as... Well, you'll have to open it up and see for yourself!

G-Fighters

HD 26 X 22 min

Lynn is your average boy, who likes superhero and looks after the stray cats in his backyard. One day, he found a strange cat on his way home, thinking it was another stray cat in need of his care. In fact, it was not an ordinary cat but a robotic weapon belonging to the super villain called Gala-Gahs. When Bolaven, one of Gala-Gahs' ten disciples, broke into Lynn's home to take the alien cat back to his master, Lynn flees with his feline friend, but could not make it far. Cornered by the powerful chaser, the duo looked hopeless, but then the alien cat combines with Lynn and they transformed into a cat-boy superhero. As Lynn struggles to take stock of his new powers with his feline companion, he realizes there are other powerful kids like him. They coalesce and take the noble vow to save the city from the alien villains.

- Language(s) Available : English
- Producer : EBS • Age Group : Preschool

Go, Torara! Go!

HD 88 X 10 min

It seems that there are more models for bad manners than good, even if we want to teach our children how to be ethical young citizens. In his critter- populated town, Torara the hamster gets into all sorts of funny predicaments where he's a little confused about what to do as he tries to impress his sweetheart, Banbunny, steers clear of Danjugi the mischievous guinea pig, and hears advice from Mr Blub-blub the fish and Dalileon, the guinea pig who runs the local train station. Torara's mother is also there to nudge him in the right direction. These characters are depicted by actual animals, including a mouse and a hedgehog, living in a colorfully laid out town, all telling stories designed to build character and to get kids to think about how to treat others.

SEMI and the Magic Cube

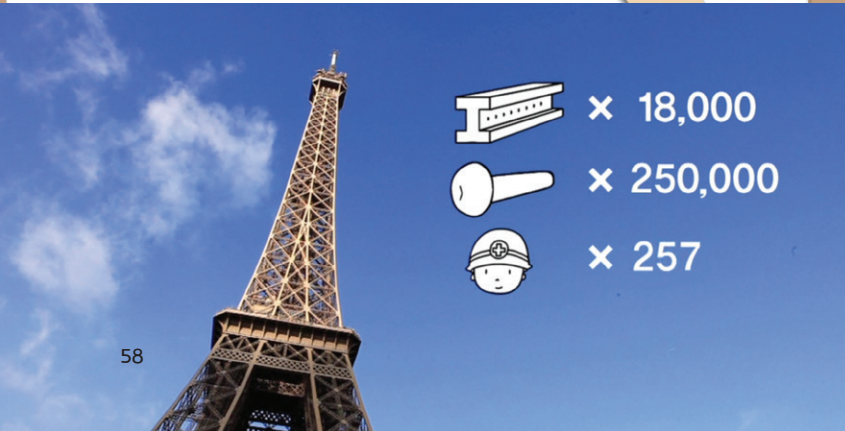

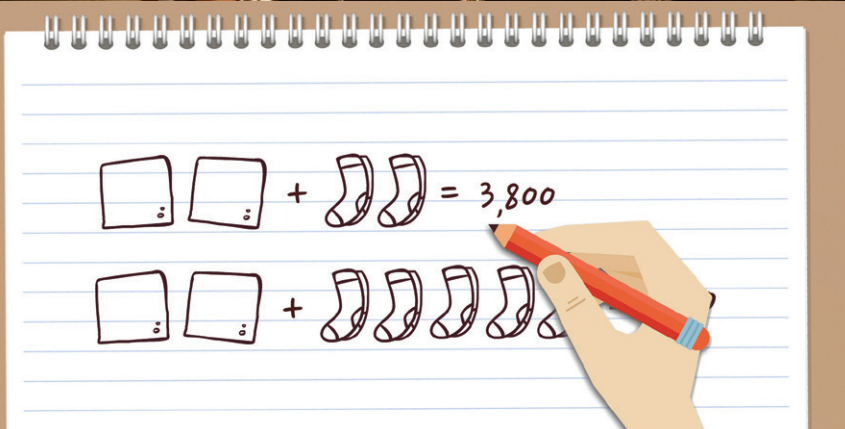

HD 26 X 15 min

A scroll of dark magic that has been kept for a long time is stolen. Ten years from now, the sleeping Magic Cube wakes up. Who will stop the calamity of the darkness that comes with the legend?

A Master Math Wizard must be found to stop the impending doom. Y, a brilliant teacher at Math Wizardry School, looks for a student to become a Master Math Wizard. Y finally finds SEMI, who has exceptional intuition for mathematics. They return to Math Wizardry School, where is already under Dark Magic of his rival X. Math genius Y and SEMI are unwittingly at the center of this momentous event and get sucked into the Magic Cube, where they go on adventures in various space-time dimensions. SEMI matures into a Master Math Wizard as she uses math to tackle the many challenges they confront in their cross-temporal, cross-dimensional journey. Will SEMI and Y find the Holy Grail before X and rescue the Math Wizardry School from Dark Magic?

Science

Cat's-eye Science

: Experiments from a cat's perspective

HD 26 X 15 min

If we look around our immediate surroundings with curiosity, everything is fascinating.

<Cat's-eye Science> suggests a very simple idea; watching and listening to things in everyday life, but as if never encountered them before. The way cats behave - cautiously observant and curious. Observing with a cat on the screen, we can find the importance of observation and do fundamental scientific activities such as comparing, sorting, and performing simple experiments to strive for 'science by observing and discovering' rather than 'science by explaining.'

Science

Whimsical Workshop

HD 26 X 15 min

Based on the philosophy of the Maker's Movement, children and teens discover their needs, new ideas, and create things they can touch and use. Moreover, it promotes the design-thinking process that delves into the why, what, and how, thus helping to improve problem solving skills.

A comical sibling duo makes things based on somewhat outlandish ideas that they get from everyday situations. Children are encouraged to be makers themselves by watching a pair of ordinary siblings of their age group make things such as a birthday cake without a cake, a hands-free umbrella, a pillow customized to one's unique sleeping habits, and other whimsical everyday items.

Science

Why?

HD 26 X 5 min

Children are full of curiosity about the world around them. Any adult who spends time with kids knows the experience of being bombarded with endless questions of how?, why?, and what? as these young people try to figure out the world around them. It is for those inquisitive minds that <Why?> has been developed. Taking its name from the most common question kids ask, this series aimed at students from grades 1 through 6 imparts the foundations of science — and some of its fun secrets — in a way that is exciting and engaging. Stop-motion animation and 3D computer graphics make the subject matter anything but dull.
