EBS

ABOUT EBS

EBS - Korea Educational Broadcasting System is the one and only public educational broadcasting company in Korea. EBS is now operating 8 different channels, including 2 terrestrial TV channels, 1 radio channel, 3 satellite TV channels specialized in educational programs, 1 IPTV children's channel and 1 channel for Korean-Americans. Terrestrial channels offer preschool and youth programs, culture programs and documentaries for adults. Besides TV channels, VOD service and diverse array of e-Learning content of different levels and different target ages are provided via online/mobile platform.

PROGRAMS

EBS strives to produce top-notch children's programs and documentaries. After its dedication in making science, history and nature documentaries, EBS's premium documentaries are acknowledged in the global content market and work with major broadcasters in the U.S and Europe, including PBS, Smithsonian Channel, France 5, Arte, and RAI, etc. EBS children's programs have been leading the preschoolers and children content market. EBS animation, such as 'Pororo, the Little Penguin' and 'Super Wings' air in all over the world entertaining and educating the younger audience.

POISON

The word “virus” comes from the same Latin word “virus” which means poison. Virus has long been treated as poison to humans. The fear was worse because the virus is invisible to the human eye.

The aim of this VR work is to let the users understand how the viruses move, and the reason why they attack humans. Users will see the world and control the virus’s behavior by becoming the ‘will of the virus’. Through this immersive experience, users are able to intuitively feel the intelligence of the virus and its danger. The main goal of this VR experience is to let the people be alert, to question, to be aware of our enemies, and to think about what we can do for our lives.

Due to the pandemic, we are considering that there will be less opportunities to present the work to massive users in large scale exhibitions or events. For those reasons, we built our VR piece compatible for Oculus Quest so that we can reach more audiences both online and offline.

 **1 X 10 min** Clean, M/E, English dubbed / 2021

HMD Recommended : Oculus Quest (preferred), Other 6DoF VR headsets including Oculus Rift or Vive (optional)

Mating Machine

Episode

- 1 Males
- 2 Females

Why do males are more outstanding in their physical appearance? Why are females so picky in choosing their mates? Why do we do things that have nothing to do with our survival? We search for the answers by delving into the lives of plants, insects, fish, mammals, birds, and primates of the world. The true winner of the battlefield of evolution is not the ones that survive, but the ones that succeed in mating. We have evolved into both surviving machines and mating machines.

4K **UHD** 2 X 50 min Clean, M/E, English dubbed / 2021

The Science of Cooking

Episode

- 1 Heat
- 2 Force
- 3 Fermentation
- 4 Taste

“The invention of cooking is what led to the rise of humanity” - Professor Richard Wrangham, Biological Anthropology, Harvard University

Humankind has been creating countless ways of cooking food as long as we can remember. Cooking is the product of human efforts for obtaining energy from nature. And within those efforts lies the essence of wisdom achieved by humankind. From a new angle, this documentary series takes a look at the world of cooking which is a series of endless accidents, adventures, and unexpected connections. "The Science of Cooking" divides the foundation of cooking into the four elements of heat, force, fermentation, and taste, covering each in a separate episode.

The Millimeters of the Sea

Episode

- 1 Miracle of Millimeters
- 2 The Secret of Breeding
- 3 2,000km, Miracle of Life

HD 3 X 50 min Clean, M/E, English dubbed / 2021

The ocean is a heartless war zone, where the number one priority of inhabitants is 'survival.' In this dog-eat-dog world, how do these small organisms manage to survive?

The smaller the creature, the more taxing and competitive it gets to survive. Warty sea squirts are the size of a fingernail, but hundreds of microscopic organisms freeload off their surface, and 10-centimeter-long blennies engage in violent fights to protect their eggs from starfish. And during their spawning season, smooth lumpsuckers stay completely still to protect their eggs even as they are being devoured alive by sea urchins.

But all the harsh struggles of these small organisms make up what is a grand and beautiful ocean. Without them, the 2,000-kilometer coral reef community 'Great Barrier Reef' that can even be seen by satellites would not exist.

Insects, Masters of Strategy

Episode

- 1 Secret Birth
- 2 Hide-and-Seek

4K **UHD** 2 X 50 min Clean, M/E, English dubbed / 2021

The prejudice surrounding insects has been a source of many misunderstandings. Research has even shown that insects enriching the earth have decreased by 25% over a period of 40 years. Are insects really deserving of the hate and underestimation by human beings?

This Documentary looks at the small world of insects resembling the world of humans in its clever survival methods, where insects fight to live another day and preserve their offspring. Also revealed for the first time will be the mysterious habitats of cockroach wasps, mantispids, and clothes moths.

The Sixth Mass Extinction

Episode

- 1 Destruction of Habitats
- 2 Expansion of Cities
- 3 Climate Change
- 4 Intercontinental Migration
- 5 Change in Relationships

There were five mass extinctions in 4.6 billion years of our Planet's history and now the Sixth Mass Extinction is underway. Unlike the previous five mass extinctions, that were caused by catastrophic global events such as asteroid impact and ice age, the cause of the Sixth Mass Extinction is the human activities. <The Sixth Mass Extinction> visits the sites of current extinction caused by humans and documents the conflicts between humans and wildlife, exposing the reality of mass extinction in the macroscopic viewpoint of Anthropocene.

POST CORONA

Episode

- 1 In Search of the Old Normal
- 2 The Most Ordinary People
- 3 Changing Perception of Government
- 4 Coexistence with Viruses
- 5 Is True Equality Possible after COVID-19 Ends?
- 6 Virtual Scenario X

“The speed of history is accelerating. What used to take years and decades is now possible in a matter of days. Even if this crisis ends, we can no longer return to the past.”

“Post Corona” asserts that the changes coming to our post COVID-19 world will be extremely fundamental and that we won't be able to return to our past ways. Then what kind of future awaits us? To understand the direction and acceleration of that change, “Post Corona” interviews scholars from both Korea and abroad, reaching voices all over the world.

Throughout this journey, we meet humanity's amazing adaptability to adjust and maintain life even after COVID-19, as well as experience heartbreak over the concentrated damage the pandemic has had on the vulnerable. We dive deep into the diverse opinions and dialogue surrounding the issues of basic income and the role of the government. We also gain fresh insight into the environment, the virus, and the essence of human relationships.

KEEP OUT! Women Over 60 Only

Episode

- 1 Together, Living Alone
- 2 End of Youth

HD 2 X 50 min Clean, M/E, Korean dubbed / 2021

The documentary features three women in their 60's who became alone for their own reasons: single, widowed and divorced. They're looking for a way to live on their own. At the same time, they ponder if they will be able to live alone forever as they're preparing for their old age. They want to find new alternatives to life. The documentary recorded a month-long 'Together, Living Alone' share house experience of three people who come from different places and lifestyles. They become close as they open up to each other about depression and fear that comes with being alone. As they briefly share their lives together, inevitable problems arise. Let us take one step further from the question of 'Who am I going to live with?' and try to find the answer to another question, 'How am I going to live?'

- 5 Vietnam - My Hero

HD 5 X 50 min Clean, M/E, Korean dubbed / 2021

The Beast Project is a drama based on mythologies from five different Asian countries. These childhood myths and legends have been reinterpreted in a contemporary way.

Beasts of Asia, combining elements of nature documentary and drama in capturing the ecology of real animals, presents stories of humans and animals in a uniquely Asian setting with harmony rather than conflict.

Mythologies possess the fundamental power to foster a child. These mythologies, previously disregarded as old tales, are expected to demonstrate their full power in the upcoming era of the Fourth Industrial Revolution.

OCEAN KING

Over billions of years, the Earth has birthed a countless variety of life forms. The genesis of all life is the ocean. The ocean is life's great incubator where creatures big and small eat and are eaten, where life and death intersect. Among all the creatures that have existed underwater throughout all time, who do you think was the most powerful Ocean King in history?

To dive deep into the ocean and explore the birthplace of life is a challenge that mankind can only dream of. Unfamiliar ancient sea creatures like the Pliosaurus, Tylosaurus, Dunkleosteus, Helicoprion, and Deinosuchus are summoned right into us. Which of these unrivaled ancient creatures, tens of meters long and tens of tons heavy, ruling the ancient ocean was the most powerful king of them all? The Pliosaurus? Or the Deinosuchus? The decision is yours to make.

History of the Wild

Episode

- 1 Country of Beom
- 2 Extinction of Beom

4K **UHD** 2 X 50 min Clean, M/E, English dubbed / 2020

In the past, there was a large number of tigers and leopards in the Korean Peninsula. Our ancestors called tigers and leopards "beom," and "beom" was considered as objects of fear and worship.

In Episode 1, we take a look at various tales between our ancestors and "beom" and vividly shows the ecology of Korean tigers and Korean leopards living in Primorsky Krai of Russia, which is the only wild habitat of Korean "beom" left in the world. After the Japanese occupation and the Korean War, "beom" went extinct in the Korean Peninsula. The ecosystem of wildlife in the Korean Peninsula is severely distorted. Species diversity is limited, but the number of each species is abnormally high. Episode 2 shows that the biggest reason behind this distortion is related to the extinction of "beom." We delve into the Korean Peninsula's ecosystem of wildlife without "beom" and find out about the importance of their presence in the ecosystem.

Mystery Migration:

Red Crabs of Christmas Island

Episode

- 1 The Silent Inhabitants
- 2 An Arduous Journey
- 3 The Crimson Homecoming

HD 3 X 50 min Clean, M/E, English dubbed / 2020

Once a year, the coasts of Christmas Island turn bright crimson. The red crab migration sweeps across the island in one of nature's most spectacular mysteries. Their habitat is an Australian territory in the Indian Ocean with 63% of its land preserved as a national park. Around its namesake holiday, a crimson carpet covers the ground as more than one hundred million red crabs march from inland forests to the shores. They risk their lives on this twelve-hour journey to spawn in the sea. Watch as they migrate en masse, spawn in triumph, and return as baby crabs to carry on life for the stunning species.

Songgwangsa,

Echoes of the Great Pines

Episode

- 1 Ties of Temporality
- 2 Impermanence

4K **UHD** 2 X 50 min Clean, M/E, English dubbed / 2020

3AM; the time when birds, underwater creatures, and all the living creatures become conscious of their sufferings. At "Songgwangsa", where 16 monks of high virtue followed the Buddhist teachings, sounds of bells, drums, wooden clapper, and gongs situated on Korea's most spiritually revered mountain, Jogyesan. Songgwangsa is home to a large community of Buddhist monks. Young monks from all over Korea, and even foreign monks, come to the temple to train. Also, a night owl catches its breath after an arduous hunt, and a hungry leopard cat falls back asleep. A young flying squirrel completes its maiden flight, and the kingfisher insistently fills up with fish for migrating back home. None abide on a single moment. Days and nights come by and seasons circle in four colors. Yet, even a fraction of moment never comes again. Buddhism describes reasons of impermanence as nature itself. This wildlife documentary portrays the emptiness of the ever changing nature and the creations within, projecting the desire of transcendence onto nature.

The Male

-  Korea UHD Award 2019
-  Korea Broadcasting Award 2019: Best Filming

Episode

- 1 A World of Insanity
- 2 Birth of the Artform

4K **UHD** **2 X 50 min** Clean, M/E, English dubbed / 2019

There are two purposes of life; survival and sex. Survival of the fittest and sexual selection drive populations of all lifeforms. Surviving without the act of sex is meaningless as it means no reproduction. The winner of the ruthless “evolutionary war” is not the one who had survived, but rather who had succeeded in sexual selection: the reason why males have such a strong desire and craze for sex. The UHD documentary, <The Male>, closely captures 20 rare species of “sex-crazed” fervent male birds from all around the world, exploring how sexual selection can be both holy and miraculous through the observation of 30 different species of birds in Australia, Papua New Guinea’s jungle, Senegal in Africa, Central and South America, Northern Europe, and other parts of Asia, such as Japan and Indonesia.

Galapagos:

The Edge of the World

Episode

- 1 Survival
- 2 Ocean of Confusion
- 3 Coexistence, Is It Possible?

4K **UHD** **3 x 50 min** Clean, M/E, English & Spanish dubbed / 2019

The isolated islands in the middle of the Pacific Ocean, with the creatures that call the island home and found nowhere in the world. How could a small number of species evolve in the vast variety of life we see in Galapagos?

<Galapagos: The Edge of the World> takes the viewers to the evidence of Darwinian evolution. Known for its vast number of endemic species, <Galapagos: The Edge of the World> explores the standpoints of evolution, environmental change and the interference between human and nature vividly captured in UHD.

The Secret Kingdom

Episode

- 1 The Birth of an Empire
- 2 A Dangerous Cohabitation

HD 2 X 50 min Clean, M/E, English dubbed / 2019

An enormous underground kingdom lies beneath our world, under the rule of 0.1cm~1.0cm-long creatures; the kingdom of ants. We set our feet into this kingdom in hopes to find answers to our questions: “who rules the kingdom of these little creatures?” and “how is the kingdom maintained?” four years of observing and researching, and a full year of filming, exposes the power game within the kingdom. Thief insects creep inside the kingdom preying on precious larvae and eggs. How do these invaders survive in this secret kingdom? A complex yet intriguing society, just like ours, reveals the secrets lives of the tiny but fascinating creatures.

The Night

Episode

- 1 The Planet of Chickens
- 2 Techno Fossil

Red crabs on the Indian Ocean’s Christmas Island migrate to breed and spawn during the full moon in December. Brown hawk-owls follow moths into the city gathering under the bright street lamps making themselves home, while the city cicadas lose their nighttime singing round the clock. <The Night> explores the ecology of the nighttime, portraying the role of the moon that enables the ecological links that have been undergoing over hundreds of millions of years. This program uncovers the astro-physical phenomena engendered by the night and the moon, along with the biggest evolutionary secrets of the earth’s ecology and life forms. This secretive but dynamic true nature of the night is captured through multidimensional compositions and high-resolution videography.

4K **UHD** 2 X 50 min Clean, M/E, English dubbed / 2018

THE NIGHT

Livestock

Episode List

- 1 The Great Partnership
- 2 Luxury Foods: Milk and Meat
- 3 Working Livestock, Working Humans
- 4 A Very Old Partnership

Animal domestication, a momentous event in human history, was not a unilateral process led by humans but a result of human-animal cooperation.

<Livestock> explores the impact of animal domestication on human history and investigates the most desirable humanlivestock relationship. It explores the diversity of roles played by livestock in the lives of humans, from a historical, anthropological and archeological point of view.

4K UHD 4 x 50 min Clean, M/E, English dubbed / 2017

Strategy of Life

Episode List

- 1 Endless selection: Mating Game
- 2 Secret War: Courtship Behavior

Our planet is full of wondrous creatures. Among them, living organisms that have survived and evolved for over four billion years, who are probably some of the most amazing of all the creatures. What is the secret of their long survival? Why do living things strive to survive? Through extraordinary UHD(4K) images, this documentary captures the crucial factors to teach that can reveal to viewers the true magnificence of Mother Nature and how living things strive to achieve their ultimate goal; evolution and survival through reproduction.

4K UHD 2 x 50 min Clean, M/E, English & Spanish dubbed / 2017

Gibbon, the Singing Ape

Episode List

- 1 Music Instinct
- 2 Family Society

This documentary sheds light on the ecology of the least known anthropoid apes in Asia – gibbons. We reveal how they communicate through singing and how they establish their social structure based on monogamy. For 2 years, we have tracked them throughout Indonesia and Thailand, capturing their lives. There are 18 recognized species of gibbons. For the first time in the world, our cameras filmed several species of wild gibbons, focusing on the ecology of these small anthropoid apes. 5 of the 18 species have been caught on camera, of which the story of the white-handed gibbon, the siamang, and the Javan gibbon unfold in this documentary.

HD 2 x 50 min Clean, M/E, English dubbed / 2017

Moment

There's a moment between what has passed and what is cor
and when light and darkness pass by between life and death
A sudden sense of deception
and then moments so bright, devastating and vivid.
Moments that can disappear in the blink of an eye.

Moment

Episode List

- 1 Moments of Eternity
- 2 Between What Has Passed and What Is Coming

How do living creatures adapt to the moments demanded by time? A great tit smoothly flies through the web-like branches to escape from a sparrow hawk. A maple tree releases its seeds. A flying squirrel glides through falling leaves, and a goshawk spends half a day to hunt a rabbit. A rice fish jumps and snatches a flying water strider like a circus. All these moments happen in the blink of an eye. Along a misty riverside, private lives of many living creatures thrive within every moment.

HD 2 x 50 min or 1 x 55 min Clean, M/E, English dubbed / 2016

Green Animal

Episode List

- 1 Breeding
- 2 Hunger
- 3 Sex

<Green Animal> reveals that plants are also animals that contain desire and will. Plants suffer from a lack of nutrients while having the sexual reproduction urge to spread its DNA like animal. Plants have to react more sensitively to the surrounding environments because they cannot travel; they have to move more actively in order to survive. They exist in the different time in comparison to our time. Root hunts for moisture and nutrients, while stem functions as olfactory sense that tracks the smell of the host. To survive in infertile environments, it plants its seeds deep into the ground; and to effectively eject scents that can attract pollinators, it emits more than 35°C of heat. This is a documentary about the lives of plants from the perspective of animals.

4K UHD 3 X 50 min Clean, M/E, English dubbed / 2016

Green Animal

Snakes

Secrets of Nature's Deadliest Creatures

A rare glimpse into
the secret world of snakes.

Snakes, Secrets of Nature's Deadliest Creatures

How do living creatures adapt to the moments demanded by time? A great tit smoothly flies through the web-like branches to escape from a sparrow hawk. A maple tree releases its seeds. Central Asia

Spirit of The Wild

Wild Survival

“Survival of the fittest” - This most basic of Darwinian concepts has served as one of the most influential theories in the 20th century, used to explain countless phenomena encompassing a diverse array of fields from sociology to economics. In “Wild Survival,” we return to the most basic meaning of the phrase, exploring what it means to survive in nature, and revealing the survival secrets of some of the most fearsome beasts known to man. In this dynamic series on nature, we offer an intimate glimpse into the relationship between the hunter and the hunted.

Episode List

- 1 The Tiger, Guerilla Hunter
- 2 Lion, King of the Savanna
- 3 The Fall of the Frozen Kingdom
- 4 In Search of Water
- 5 The Secret Life of Marsupials

HD 5 x 50 min Clean, M/E, English dubbed / 2015

Birds of Paradise

Untouched by modern civilization and located under the searing equatorial sun, Papua New Guinea is home to a diverse ecosystem. And in this ecosystem lives birds which are so spectacular in appearance that they are called birds of paradise. In this 3-part documentary, we explore the birds and their intricate courtship dances. Also, we learn about the bower bird and the complicated structures they build in order to seduce mates. Full of amazing creatures which are both intelligent and beautiful, this series gives us new insight into Papua New Guinea’s ecosystem and a renewed appreciation for the biodiversity which is being threatened all throughout the world.

 STVF(Shanghai International Film & TV Festival) 2014 screened

Poison,

An Evolutionary Mystery

There are countless factors that influence the evolution of life such as a change in the environment, parasites, food, natural enemies, the climate. In such evolutionary diversity, the ability to produce poison is the most extraordinary. The documentary crew visited deserts, rain forests, and the ocean floor in search of poisonous animals. By studying these creatures, the documentary attempts to answer questions on the correlation between poison and natural selection, and what role poison plays in the march of evolution.

- ### Episode List
- 1 Poison, Strategy for Survival
 - 2 Poison, in the Ecosystem
 - 3 Poison, the War of Plants and Animals

HD 3 x 50 min Clean, M/E, English dubbed / 2014

Central Asia,

Spirit of the Wild

Central Asia located in the center of the Asian continent consists of endless plains, arid deserts and treacherous mountains, making it the most isolated and dangerous terrain in the world. This is how it has remained relatively unknown to the rest of the world and preserved its nature in its original form.

Episode List

- 1 Prologue- Untamed Land
- 2 Winter of the Wolves and Nomads
- 3 Song of the Wind, Tales of the Land
- 4 Pamir and the Himalayas
- 5 Life Fills the Water

HD 5 x 50 min Clean, M/E, English dubbed / 2015

Insects, the World of Millimeters

While tiny and seemingly insignificant, insects are nature's most formidable force. They have been programmed through eons of evolutionary history for one reason only, that is to survive and propagate. Yet, they also serve a vital role in balancing the ecology. In "Insects - The World of Millimeters," we focus on the amazing and innovative survival strategies that insects have evolved in order to adapt to their surroundings, and learn how through competition and cooperation, these incredible creations of evolutionary history have contributed to not only balancing, but also sustaining the global ecology.

Episode List

- 1 The Great Strategy
- 2 Leaves, a Micro-Cosmos

HD 2 x 50 min Clean, M/E, English & Spanish dubbed / 2014

Parasite

Organisms as old as life itself, parasites are a hidden force which infests every known corner of the earth. While parasites are mostly known to slowly suck the life out of their hosts, some parasites are known to be helpful, a notable example being the parasite that causes sickle-cell anemia. Even now, this complex and intricate relationship between parasites and hosts continues to develop. Join us in this fascinating and eye-opening exploration of some of earth's most stunning and mysterious creatures. This exciting new 2-part documentary opens the doors to the thrilling world of parasites and asks the ultimate question, "Can man and parasites co-exist?"

Pamir, Land of Secrets

Located at the junction between Tian Shan, Karakoram, Kunlun, and Hindu Kush ranges, forbidding altitudes and political strife has kept the Pamir Mountains beyond reach for many explorers. Witness great pastures unfolding 4,000 meters above sea level, creatures big and small, wild and domesticated, struggling for survival, in an untamed land where man has yet to assume supremacy. The gorgeous scenery of frozen lakes hidden deep within thick snow and rare species that live only in the most remote areas have all been captured on film for the very first time.

HD 3 x 50 min Clean, M/E, English dubbed / 2014

Snow Leopard, the White Recluse

Far-removed from the tropical jungle or sun-scorched plains in which we would usually expect to find a leopard, this two-part documentary takes us from the very roof of the world - the peaks of the Himalayan and Altai mountain ranges - to the barren wasteland of the Gobi Desert in search of that mysterious creature known as "The White Recluse". Seldom seen even by the residents of these high mountain plateaus, no expense or effort was spared on the part of our production team, who, along with some state-of-the-art technology and the aid of local nomads and the residential team down at the Snow Leopard Research Center, walked boldly into the leopard's lair. And while patiently waiting for the star of the show to appear, we take the time to become acquainted with the local wildlife and nomadic families who share this harsh terrain with the White Recluse itself. We also take a look at the direct way in which the predatory drives of the snow leopard affects the livelihoods of those who share its natural habitat.

HD 2 x 50 min Clean, M/E, English dubbed / 2013

Mekong, the Cradle of Life

Winding from the Tibetan Plateau in China's Yunnan Province, southward through Myanmar, Laos, Thailand, Cambodia, and eventually Vietnam, the mighty Mekong is over 4,000 kilometers long and is the source of life for tens of millions of people from Tibet to the Indochina Peninsula. The river defines the borders of these countries at the same time that it intertwines their cultures and history. This stunning three-part documentary explores the region and the people whose very existence depends on this major world river. **Part 1** explores the economic activities that sustain the region, from high-elevation farming in Yunnan Province to delta fisheries in Vietnam. **Part 2** explores the role that the Mekong has played in the development of unique cultures along its path, while **Part 3** explores how the river has helped shape the thriving religious faiths of the region.

The River, Odyssey of Life

In this stunning documentary marked by visual virtuosity and ravishing cinematography, we explore the rivers of Korea throughout the four seasons. There are intimate encounters with the flora and fauna of the rivers, as we learn about the cycle of life and nature which unfolds in an intricate dance in accordance with the changing of the seasons. And through these encounters, we are given a deeper appreciation of the delicate balance which must be maintained for a river ecology to support the countless creatures which are part of it. Also, through never-before-seen underwater shots of fish in their natural habitat, the documentary tells an intriguing tale of life, death and survival which is both universal and timeless.

The Volcano

Straddling the border of North Korea and China, sacred Mt Paektusan is a place of grand beauty and a symbol of unity for the two Koreas. But geologists worry that this sleeping behemoth may be overdue for an eruption like the magnitude-7 cataclysm that rocked East Asia a thousand years ago and plunged the world into darkness. This two-part series analyzes what might happen if such an event were to occur, while also looking in depth at other peoples who live in the shadow of active volcanoes.

Episode List

- 1 The Truth Behind Mt. Baekdu's Mega-Eruption
- 2 In the Land of Great Fire

Cambodia, Nature's Great Treasure

While it is perhaps best known as the land that suffered genocide at the hands of Pol Pot and the Khmer Rouge, Cambodia has more to it than merely a tragic political history. In fact, it is home to a tropical rainforest widely known as the 'Breath of Asia'. From vultures and flying foxes to bison and crocodiles, this rainforest harbors some of the rarest species on the planet, as well as sustaining the local human population known as the 'Punong' people. In this sensitively filmed two-part series, we come into intimate contact with a hidden corner of the world as few have seen it before.

Untamed Spirit, the Steppes of Asia

There is an endless stretch of grassland in the heart of the Asian continent surrounded by the majestic peaks of the Tian Shan and Altai Mountains. Simply known as “The Steppe,” it is the most expansive steppe in the world. It is a gateway which connects the ecologies of Europe and Asia, and along with the African savanna, one of the greatest habitats of a diverse array of grassland-dwelling animals and birds. Set to the backdrop of the rugged yet beautiful nature of the steppes of Asia, the documentary follows the wildlife of the region and tells the story of the region’s nomadic inhabitants who live in accordance with the laws of the great outdoors, yet, must sometimes struggle against nature in order to survive.

HD 6 x 50 min Clean, M/E, English dubbed / 2012

Tales of the Avian Hunters

Imagining the great hunters of the animal kingdom may conjure up images of lions, and tigers, or bears. But, oh my, you should not forget about the birds. These flying predators are some of the most skilled hunters in nature, boasting a variety of skills that make them masters of the sky and even the water. Using incredible footage that includes slow-motion video designed to carefully demonstrate the blink-of-an-eye tactics birds utilize to catch their next meal, this two-part documentary series lays out the myriad strategies and techniques employed by a variety of birds, from plovers to ospreys, from herons to hawks, and even eagles. The first part shows the battle over and beneath the water. The second part moves the focus upward a bit, giving the viewer a glimpse of the birds of prey who plot their attack from on high.

HD 2 x 50 min Clean, M/E, English dubbed / 2011

Extreme Lands

There are a handful of places in the world where temperatures and altitudes can reach extremes not seen anywhere else. These environments are starkly different – ranging from scorching deserts where the temperature can soar up to 63 degrees Celsius, to icy fields where things freeze in the blink of an eye. Nevertheless, the people of these regions share a common bond of determination and courage. Let us we meet these people whose lives are a testament to the strength and tenacity of the human spirit.

- 2 The Winter of Oymyakon, Siberia
- 3 The Himalayas, Life on the Edge

HD 3 x 50 min Clean, M/E, English dubbed 2011

Goshawk, the Soul of the Wind

Mention birds of prey and most people don’t think of hawks, but the hawk family has its own share of notable predators with keen hunting skills and even more adept flight. Among them is the goshawk, a wide-ranging diurnal raptor found in North America and Eurasia. This visually stimulating documentary provides a rare glimpse of this majestic bird, including meticulously captured video that demonstrates the expertise with which this bird flies, even through dense forest. Amazing slow-motion video reveals how the goshawk adroitly bounces off these barriers, turning hazards into means to propel, to stop, or to change direction.

POISON VR

The word “virus” comes from the same Latin word “virus” which means poison. Virus has long been treated as poison to humans. The fear was worse because the virus is invisible to the human eye.

The aim of this VR work is to let the users understand how the viruses move, and the reason why they attack humans. Users will see the world and control the virus’s behavior by becoming the ‘will of the virus’. Through this immersive experience, users are able to intuitively feel the intelligence of the virus and its danger. The main goal of this VR experience is to let the people be alert, to question, to be aware of our enemies, and to think about what we can do for our lives.

Due to the pandemic, we are considering that there will be less opportunities to present the work to massive users in large scale exhibitions or events. For those reasons, we built our VR piece compatible for Oculus Quest so that we can reach more audiences both online and offline

HD 1 X 10 min Clean, M/E, English dubbed / 2021

The Sixth Mass Extinction

Episode

- 1 Destruction of Habitats
- 2 Expansion of Cities
- 3 Climate Change
- 4 Intercontinental Migration
- 5 Change in Relationships

HD 5 X 50 min Clean, M/E, English dubbed / 2021

There were five mass extinctions in 4.6 billion years of our Planet’s history and now the Sixth Mass Extinction is underway. Unlike the previous five mass extinctions, that were caused by catastrophic global events such as asteroid impact and ice age, the cause of the Sixth Mass Extinction is the human activities. <The Sixth Mass Extinction> visits the sites of current extinction caused by humans and documents the conflicts between humans and wildlife, exposing the reality of mass extinction in the macroscopic viewpoint of Anthropocene.

The Science of Cooking

Episode

- 1 Heat
- 2 Force
- 3 Fermentation
- 4 Taste

HD 4 X 50 min Clean, M/E, English dubbed / 2021

“The invention of cooking is what led to the rise of humanity” - Professor Richard Wrangham, Biological Anthropology, Harvard University

Humankind has been creating countless ways of cooking food as long as we can remember. Cooking is the product of human efforts for obtaining energy from nature. And within those efforts lies the essence of wisdom achieved by humankind. From a new angle, this documentary series takes a look at the world of cooking which is a series of endless accidents, adventures, and unexpected connections. "The Science of Cooking" divides the foundation of cooking into the four elements of heat, force, fermentation, and taste, covering each in a separate episode.

POST CORONA

Episode

- 1 In Search of the Old Normal
- 2 The Most Ordinary People
- 3 Changing Perception of Government
- 4 Coexistence with Viruses
- 5 Is True Equality Possible after COVID-19 Ends?
- 6 Virtual Scenario X

HD 6 X 50 min Clean, M/E, English dubbed / 2021

“The speed of history is accelerating. What used to take years and decades is now possible in a matter of days. Even if this crisis ends, we can no longer return to the past.”

“Post Corona” asserts that the changes coming to our post COVID-19 world will be extremely fundamental and that we won’t be able to return to our past ways. Then what kind of future awaits us? To understand the direction and acceleration of that change, “Post Corona” interviews scholars from both Korea and abroad, reaching voices all over the world.

Throughout this journey, we meet humanity’s amazing adaptability to adjust and maintain life even after COVID-19, as well as experience heartbreak over the concentrated damage the pandemic has had on the vulnerable. We dive deep into the diverse opinions and dialogue surrounding the issues of basic income and the role of the government. We also gain fresh insight into the environment, the virus, and the essence of human relationships.

Neuro Sapiens

Episode

- 1 Money
- 2 Violence
- 3 Art
- 4 Sex
- 5 Religion

Why we, as humans often make ridiculous decisions? Is Homo sapiens' brain coping well in this complex modern world? JEONG Jae Seung, a Professor and brain engineer, explores the world seeking for the essence of a mankind hoping to gain a better understanding of humans in general by taking on a scientific approach explaining five unique phenomena of humans: sex, money, violence, art and religion.

The Central Bank of the World

Episode

- 1 Price and Central Bank
- 2 Economic Crisis and Central Bank
- 3 Future Currency and Central Bank

HD 3 X 50 min Clean, M/E, English scripted / 2020

The history of money has continued since the 10th century BC, however, the history of the central bank, issuing and distributing money, has been only 300 years.

How and why is central bank created?

<The Central Bank of the World> aims to enhance the public's understanding of the economy by showing the central bank's function in relation to real life surrounding inflation, the financial crisis, and future currencies and its role in the US, Latin America, Europe and China.

Anthropocene

Episode

- 1 The Planet of Chickens
- 2 Techno Fossil
- 3 Andre's Sea

HD 3 X 50 min Clean, M/E, English dubbed / 2019

The “Anthropocene,” similar to the Jurassic and the Cretaceous era, is a proposed epoch having significantly influenced by human activities causing environmental changes. “Chicken bones,” “Plastic” and “Overpopulation” are the three keywords to examine how humanity has affected the biosphere. Claiming our era as Anthropocene acknowledges how humans hold immense influence upon Earth and is about to push civilization in a grand, geographical scale. The documentary scrutinizes Anthropocene in attempt to collect atmospheric chemistry, geological and biological evidence, through the expertise of Jan Zalasiewicz; the chairman of the Anthropocene Working Group, William Steffen; Emeritus Professor of Australian National University, and Jared Diamond; the author of “Collapse: How Societies Choose to Fail or Succeed.”

The Entrance into the Knowledge of
All Existence Numbers, The Language of Universe

Numbers

Numbers

Episode List

- 1 π
- 2 ∞
- 3 x
- 4 0
- 5 i

Mathematics is shrouded behind a veil and does not easily reveal itself. Students resort to rote memorization of math formulas to solve problems in a boring exercise of the mind that is also repetitive. However, if you knew the history of mathematics, the way they learn math could change. <Numbers> is a documentary that brings to life the genius mathematicians who discovered new theories and frontiers in math in a way that have never been seen before to show the beauty of math.

Departing from the likes of "serious" documentaries, <Numbers> will unravel the mysteries of numbers like a sleuth following strands of clues to make math fun and approachable. Through the discovery of " π ," " ∞ ," " x ," "0," " i " this documentary will illustrate the beauty of mathematics and its intrinsic meaning.

The Beast Project is a drama based on mythologies from five different Asian countries. These childhood myths and legends have been reinterpreted in a contemporary way.

Beasts of Asia, combining elements of nature documentary and drama in capturing the ecology of real animals, presents stories of humans and animals in a uniquely Asian setting with harmony rather than conflict.

Mythologies possess the fundamental power to foster a child. These mythologies, previously disregarded as old tales, are expected to demonstrate their full power in the upcoming era of the Fourth Industrial Revolution.

Wonders of Burma

Episode List

- 1 Shrines of Gold
- 2 Myths and Magic

Before Burma was a country, it was a patchwork of kingdoms and dynasties, until one of the greatest religious reformations in Asian history transformed the area into a Buddhist wonderland. See the myths and monuments that united kings and peasants and created the Burmese culture that still exists today. We also show how this devotion to the Buddha is represented in the remarkable golden architecture that dots the cities and countryside with magnificent temples, stupas, pagodas, and statues.

Angkor, Land of the Gods

Since its discovery, Angkor has been synonymous with mystery. It is often depicted in popular culture as a place of foreboding inhabited by the gods. Few remember that the place was once inhabited by full-blooded men and women whose reasons for building the massive structures of Angkor were as earthly as they were celestial. This documentary will bring Angkor to vivid life, capturing not only Angkor Wat and Angkor Thom in their moment of glory, but the people who lived and worked there as well. Through vivid 3D imagery, it will bring the ancient structures to life, restoring them to their former glory and giving you a rare glimpse of the way they were meant to be seen by their builders.

Maya, Behind the Myth

To most, the ancient Mayans conjure images of the world of the mysterious. This is because of the rampant imaginings of western scholars spurred by a lack of research, and a media that has promulgated such wild conjectures as fact. But like any other civilization, Mayan civilization is the product of man's attempt to overcome the obstacles of his natural surroundings. In this documentary, we attempt to debunk the various myths and portray Mayan civilization through the facts that have come to light through archeological research. At the center of such research is the jungle, corn, the Mayan calendar and the descendants of the ancient Mayans who are living today.

The Ancient Splendors of Rome

When it comes to the mighty Empire of Rome, surely its greatest gift to posterity is the Colosseum that still commands the awe and admiration of people all over the world to this day. Built with 1 million bricks laid by the hands of 30,000 slaves, the Colosseum forced the Roman Genius to develop all-new building techniques which continue to benefit architects today. But it was also a tool used by clever emperors to manipulate public opinion in their favor. However, not every aspect of Roman history is quite so triumphant: The eruption of Mt. Vesuvius in AD 79 drew down a veil over the bustling sea port of Pompeii. Encased in solidified volcanic ash, little was known about the fate that befell its inhabitants. Until now, that is...

Homo Erectus and the Hand Axe Revolution

Homo erectus, also known as "Peking Man," is an ancient species of hominid. Having originated in Africa and spread to Europe and the furthest reaches of East Asia, this ancient man is mankind's true Prometheus – harnessing fire and using it for his benefit. The hand axe is the greatest invention of Paleolithic man and the most common artifact from the era. It is in a sense, the symbol of Man's intellectual awakening whereby he was able to fashion in reality, what he envisioned in his mind. In "Homo Erectus and the Hand Axe Revolution," we investigate a hand axe found at the Jeongok-ri archeological site in Korea in order to reconstruct the life of prehistoric man – his migrations, foraging and hunting activities, and his use of fire. Through vivid 3D cinematography, we recreate the lush forests of Asia 300,000 years ago where Homo erectus once roamed.

3D 2D HD 1x 50 min Clean, M/E, English dubbed / 2012

Ancient Civilizations Uncovered

From the grand pyramids on the Giza Plateau to Machu Picchu, a veritable "palace in the sky" situated 4,000 meters above sea level, ancient ruins dot the world standing testament to the determination and ingenuity of the people who built them. Yet, not much is known about these ancient civilizations. Who built these amazing structures and how did they live? Also, what motivated them to undertake these grand construction projects? In Exploring Civilizations, we take an in-depth look into these ancient civilizations and the people behind them. We will investigate the latest archeological discoveries and hear the opinions of the world's foremost experts in order to unravel the secrets that these ancient civilizations harbor.

The Mammoth, Titan of the Ice Age

Take a journey back in time, to an era when our ancestors were still living in caves. A time when the world was ruled not by man, but by mammoth. Come witness this exciting series that takes state-of-the-art computer graphics and beautiful natural video footage to realistically portray the lives of a family of these woolly giants. In vivid re-creations, live their lives through their eyes, from their day-to-day triumphs and dangers to the sad finale of their extinction. This visual treat is a must-see for anyone curious about these majestic cousins of today's elephants.

Tarbosaurus, the Mightiest Ever

Ever since their discovery in the 19th century, dinosaurs have sparked the imagination. The notion of giant reptiles the size of buildings has long been a fascination of writers, scientists, and more recently moviemakers. This entertaining but educational two-part series uses state-of-the-art computer graphics to tell the fictional tale of Patch, a tarbosaurus who 80 million years ago ruled the forests. His life story is split into two parts, the first covering his years as an infant who must first learn to hide before he can learn to hunt. The second installment shows Patch as an adult, the king of the forest and the top of the food chain — or is he?

KEEP OUT! Women Over 60 Only

Episode

- 1 Together, Living Alone
- 2 End of Youth

HD 2 X 50 min Clean, M/E, Korean dubbed / 2021

The documentary features three women in their 60's who became alone for their own reasons: single, widowed and divorced. They're looking for a way to live on their own. At the same time, they ponder if they will be able to live alone forever as they're preparing for their old age. They want to find new alternatives to life. The documentary recorded a month-long 'Together, Living Alone' share house experience of three people who come from different places and lifestyles. They become close as they open up to each other about depression and fear that comes with being alone. As they briefly share their lives together, inevitable problems arise. Let us take one step further from the question of 'Who am I going to live with?' and try to find the answer to another question, 'How am I going to live?'

A Very Special Journey: A Glass of Renowned Liquor

When it comes to a country's food culture, liquor cannot be left out of the picture.

However, unlike food that makes a name for itself as part of the Korean Wave, traditional liquor barely keeps itself in existence.

Slowly becoming without a successor, less people are seeking out traditional liquor.

But there is someone who wants to enlighten the entire world, beyond Koreans, on traditional liquor.

Dustin is a Korean liquor sommelier from the U.S.

Together with Dustin, we set out on a nationwide journey to discover hidden distilleries and renowned liquor boasting history and tradition.

Home: An Architectural Journey

What house do you live in?

Home is where you relax, tucked away from the stressors of work. It's where you and your loved ones savor the last hours of each day. It's where your family gathers around with pets in tow and where your children learn and play. Houses have evolved over the years. But when all is said and done, the place we call our home still is the center of our universe. <Home: An Architectural Journey> follows two architects as they explore different houses while learning about the lives of families who make their homes there. Travel meets architecture in this documentary series that lets us appreciate houses as homes and homes as charming houses.

A STORY OF PORK

A Story of Pork

Episode List

- 1 Pork, a Culinary Tradition
- 2 Fiesta, A Feast of Taste
- 3 Modern Cuisine with Pork

Greeting 2019, the year of the golden pig, <A Story of Pork> explores how a pork dish connotes the history of human civilization. In Western countries, pigs symbolize “greed” while in Eastern countries, they are symbols of guardianship. The first episode focuses on how pigs are consumed from China to Japan to Korea; both as sacrificial offerings and for nutritional purposes, including the distinct modern cultural history of Asia. The second episode portrays how pork dishes have evolved over time in European countries: Spain, France, Segovia, Denmark, etc., known to consume every part of the pork meat. The third episode introduces pork dishes in various forms containing pig intestines, bones and oil; considered as soul foods for ordinary people. What would these ordinary people do to protect the secrets in their pork dishes and their native pigs from significantly decreasing in numbers due to their economy?

Schools of Tomorrow: Digital Native Generation

Episode List

- 1 A School for Digital Natives
- 2 Reimagining the Classroom
- 3 Facing the Change

HD 3 x 50 min Clean, M/E, English scripted / 2019

* A co-production project of comparing four countries' education systems

How can our schools pick up a different education system in preparation for the everchanging world? <Schools of Tomorrow: Digital Native Generation> turns the mirror on various education systems from Norway to Singapore to India to Korea in hopes of finding an appropriate education method for the digital native generation: a generation grown up in immersed digital technology. The documentary speaks through the lives of 12 teenagers -in schools and homes- from four countries, to find an up-to-date educational method that is better suited for our digital world.

 Korea Broadcasting Award 2019: Best Program for Education/Culture

In the Name of Love

In the Name of Love

How must parents of the industrial age educate children who are facing the Fourth Industrial Revolution? In this rapidly changing world, the approaching future instills a new kind of fear like an unknown illness. The Fourth Industrial Revolution has been seeping into not only the society at large but also our homes, parents, and children. Values and systems that we believed would last forever are crumbling, and we will soon be competing against artificial intelligence. So how are we to prepare our children to become "future people"? This program focuses on the most basic social unit, the family. Teenagers are essentially raised by their family, the only unit that can generate love, the root of life. Since teens are still under the protection of their family while beginning to seriously contemplate their future, the role and significance of that family is especially important. <In the Name of Love> introduces six families from different culture backgrounds: Korea, Singapore, India, Mongolia, Vietnam, and Germany capturing the intense efforts of education within these families in everyday life and contemplates the role of family in this day and age, facing a complicated and uncertain future.

Way to School

How we travelled to school every day was something as natural as the sunrise and sunset. But there are students crossing the waters to go to school. They live in a small town located in Southern Vietnam, My Phuoc, where the water is their streets; their town square; and their market place. Kids from this town either commute to school by boat or by foot, tightly holding onto the handrails planted on the pathway by the river. There are more than ten reasons of hardship for them to fall out from school. But they never. The way to school leads to their future - dreams they must not let go.

HD 1 x 50 min Clean, M/E, English dubbed / 2018

Extreme Job

There are people who work under some extreme conditions; some are even unimaginable. As they overcome harsh natural environments, enormous structures, and physical limitations, they work together as a team to create modern masterpieces. <Extreme Job> will take the viewers on a journey to the ocean, the mountains, factories, and kitchens to show the lives of those who work in these extreme conditions up close. In doing so, the project will examine the value of having a professional spirit, which is fading at a fast pace, and the sacred will to overcome hardships.

Papua New Guinea, Land of 900 Tribes

Episode List

- 1 Traces of the Origin, Matupit
- 2 River of a Thousand Years, the Sepik
- 3 Land of Spirits, Mt. Wilhelm

Papua New Guinea is a land filled with primordial life force, which was unknown to the rest of the world until the early 19th century. Still, vast amounts of its territory remains untouched by modern civilization. We observe its people digging into ash from a volcano that could erupt again anytime. We meet innocent children learning mathematics and music in a school built on land covered volcanic ash. We hear stories from its people, who keep hope alive despite the harshness of nature and unfortunate history. Its 900 tribes, each with its own language live in jungle swamps more dangerous than the Amazon, below a fuming live volcano, keeping their traditional culture and pristine nature alive.

HD 3 x 50 min Clean, M/E, English dubbed / 2015

Sky Burial

Episode List

- 1 Endless selection: Mating Game
- 2 Secret War: Courtship Behavior

Sky Burial is a very unique funeral rite in Mustang District, Nepal. When your loved one died, remaining family lays a dead body outside and gives to the vultures instead of burying under the ground. With enticing scenes of Nepal, this documentary introduces the funerary practice and people living in Mustang District of Nepal who continue to practice this ceremony until these days. According to Tibetan Buddhism, people need to accumulate virtuous deeds during their lifetime for their next life to be better. And giving corpses to vultures is one last posthumous act of virtue. Having the vultures peck and eat the corpse completely is supposed to help the deceased live a better next life. Due to the nature of the rite, the villagers rarely allow foreigners to shoot footage of it, but EBS was able to gain the cooperation of a Nepalese family to reveal this funeral rite outside for the first time.

HD 1 x 50 min Clean, M/E, English dubbed / 2014

Chagangtimé, the Story of the White Camel

For most people around the world, the Gobi Desert is a name often heard but a place never seen, at least not in person. This harsh environment of bitterly cold winters and punishingly hot summers, with a nearly year-round lack of water, is a place where only the hardiest of creatures can survive. That includes the people, the descendants of ancient Mongolian horsemen who passed down the skills needed for the nomadic lifestyle still widely practiced today. This two-part documentary series follows one such extended family and their hardships as they raise camels, sheep, and other livestock on the unforgiving Mongolian steppe. With a special focus on their rare white camel, called chagangtimé, the viewer witnesses the challenges and triumphs of life in a gerr out on the prairie.

HD 2 x 50 min Clean, M/E, English dubbed / 2011

Home Sweet Home

<Home Sweet Home> is a story about houses for living rather than houses for buying. In Korea, young adults remain 'house poor' while the elderly lack housing welfare. On the other hand, France and Northern European countries consider it a potential and future loss for young people to work part or full time to pay for housing, so the governments take care of the lion's share of their housing costs. The show reflects on these realities while examining the housing situations in Northern Europe, Bhutan, and Japan.

Episode List

- 1 Where Young People Live
- 2 Where Will Your Final Home Be?
- 3 My Home Sweet Home

HD 3 x 50 min Clean, M/E, English scripted / 2017

Happiness in Architecture

<Happiness in Architecture> asks questions like "Why do we think of architecture simply as an act of destruction or reconstruction?" Even people, who think of real estate only as an economical benefit or cost, will probably remember their old houses full of memories with their families, where care and love were penetrated. Buildings are lifeless matters, but the time we spent and the memories we made in them reflect all sorts of human emotions. The viewers also can find various examples that enabled communication and psychological healing through architecture in this documentary.

Baby on the Way 1,2

Episode List 1

- 1 Shh! It's a secret
- 2 7 years + 7 months = ?
- 3 Gana, the Superboy!
- 4 Who made the forest fairy cry?
- 5 All prepared for the new baby sister!
- 6 Who will win today?

Episode List 2

- 1 Cambodia: Mondy and Me
- 2 Thailand: Somtum Girl
- 3 Vietnam: Listen to me, Baby!
- 4 Chile: Sailing to Baby Island
- 5 Italy: I'm the Big Brother!
- 6 Korea: Welcome to My Room

<Baby on the Way> season 1 and 2 are co-production between 6 different countries for each season. It is an experimental documentary series for children and families, telling stories of childhood excitement, jealousy, happiness and stress as families prepare to embrace a new member – the baby on the way. In each episode, the child protagonist's fears, hopes and dreams about the new arrival are expressed in their own words, but also visualized through animation sequences. These short films focus on the small, everyday crises of family life, and the mundane acts of caring, thoughtfulness and forgiveness which make families strong. In doing this the series reminds us of the centrality of family in all of our lives.

HD 12 x 15 min Clean, M/E, English scripted / 2016, 2017

Life on the Road

<Life on the Road> portrays the lives of Asian people who tenaciously survive in harsh conditions, living a life along the road that is paved through the raw beauty of nature. This series is a movie-like story of journeys, encounters and everyday lives of Asian people such as a couple who make a living by transporting heavy bags of food and beverages to the top of a steep volcanic mountain; a Mongolian veterinarian and his wife who treat sick animals in vast grasslands; a nomadic father and his son who face a dilemma in the rapidly changing Kyrgyzstan society; and an ethnic minority woman from Vietnam, who is a part of a matrilineal society.

HD 25 x 50 min English scripted / 2016

Finding my Daddy

Korea will soon have one million foreign laborers working and living within the country. Of the 850,000 foreign laborers in Korea, more than half moved here alone to make a living for their families back in their homelands. This documentary series is a project of laughter and emotions made by the fathers who left their families behind and their young children who bid them good-bye. These foreign laborers' young children set off to find their dads living alone and working hard in a strange country called Korea. They have never been to Korea before! As we capture their journey to find their dads on camera, we have the opportunity to see Korea and Korean people from their point of view and observe how Korean people treat foreigners. The program offers laughter, tears, and the opportunity to reflect on our own actions and attitudes. And as we see these children be reunited with their fathers, we are reminded of the true meaning of family love.

HD 64 x 50 min Korean dubbed / 2016-2017

Children of the World

There are a few places on earth skipped over by the touch of civilization with both its conveniences and its darker side which leaves its beneficiaries bereft of human warmth. They are places dominated by their natural environment where people choose to live in harmony with the nature surrounding them rather than to tame it. The children of these regions are some of the most innocent yet vulnerable members of humanity. They struggle with disease, poverty and the cruelty of child labor. Yet, even amidst their bleak circumstances, these children hold onto hope and strive to realize their dreams. This program is an intimate portrait of these children. We travel to the remotest places in the world such as Madagascar, the Himalayas, and Tuvalu, in order to tell their story.
